

Grocery Store Management Application

Team Members:

Aryan Sareen - 2401201104

Akash - 2401201108

Tanish - 2401201096

Problem Statement

- Manual grocery store management is inefficient, error-prone, and lacks digital tracking.

Objectives

- 1. Build a user-friendly grocery management web app.
- 2. Allow real-time product and order handling.
- 3. Connect frontend to backend and store data in MySQL.

Methodology / Architecture / Tools Used

- Frontend: HTML, CSS, JavaScript
- Backend: Python (Flask)
- Database: MySQL
- Architecture: REST APIs, MVC-style separation

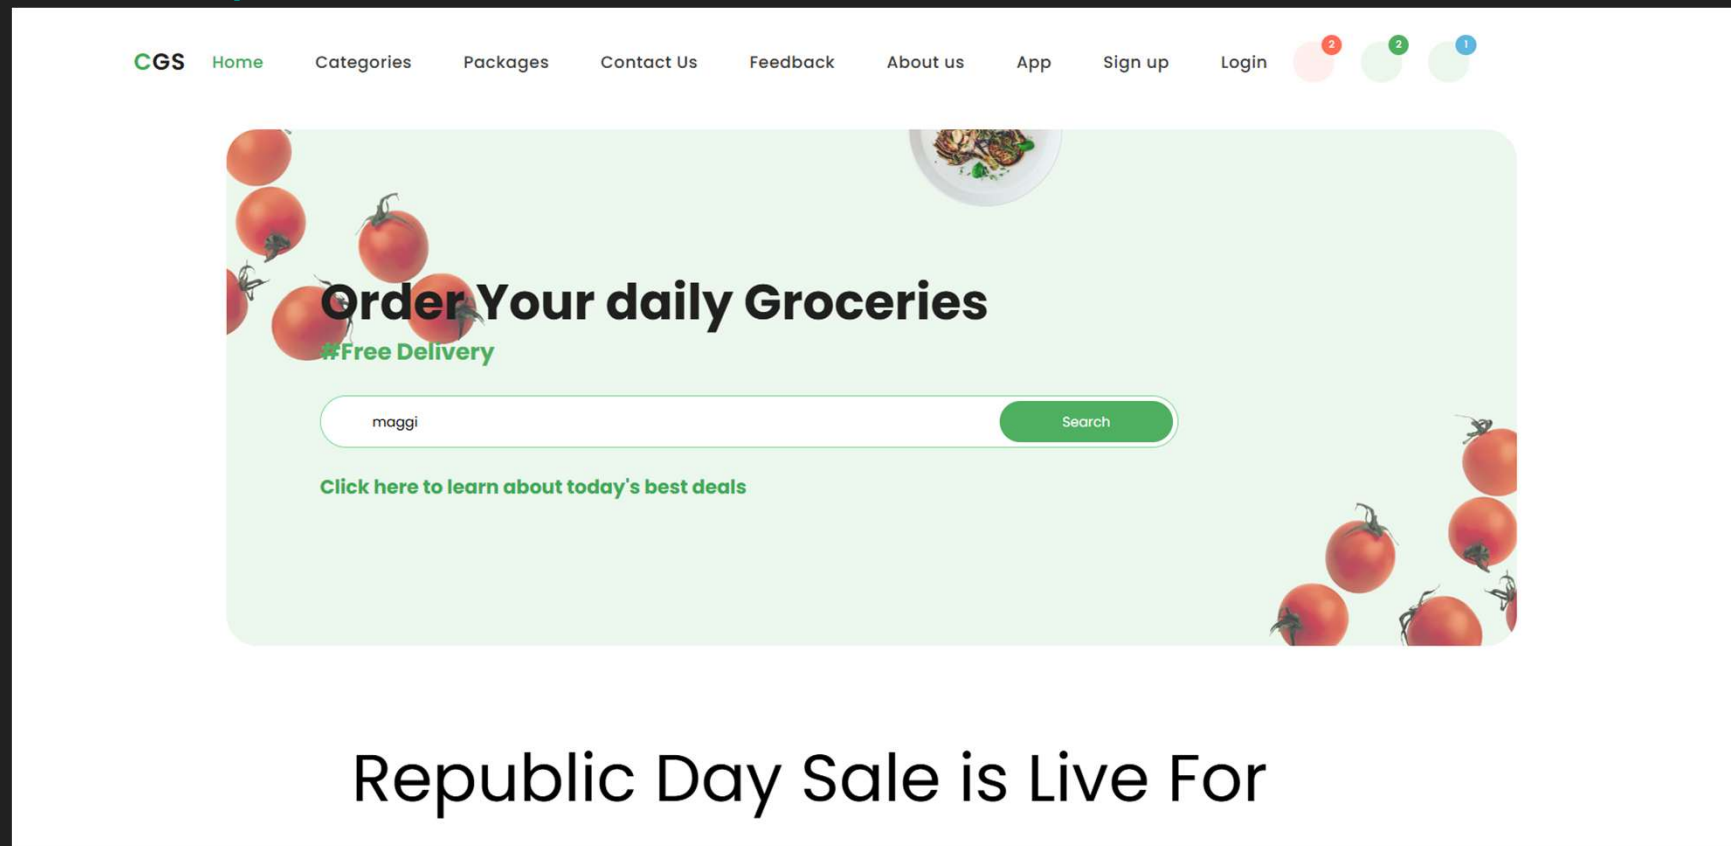

Key Features of the Project

- • Add/View/Delete/Update Products
- • Place Orders with Auto Calculation
- • Store Order Details in MySQL
- • Product Expiry ML (Upcoming)
- • Admin & Customer Interface

Screenshots of the Project

- • Homepage UI
- • Product Management Interface
- • Order Page
- • Database Records (MySQL)
- • Flask Backend Running Screenshot

What Our Clients Say

James Mcavoy
CEO

Grocery Store is the best. It never fails to dissappoint me. Grocery shopping has become so easy with Chitkara Grocery Store.

Sameer Sharma
Software Developer

This Grocery Store is just amazing. I can buy all my groceries from a single place. The groceries are available at very affordable prices. And, the groceries are delivered at the time slot you choose and prefer.

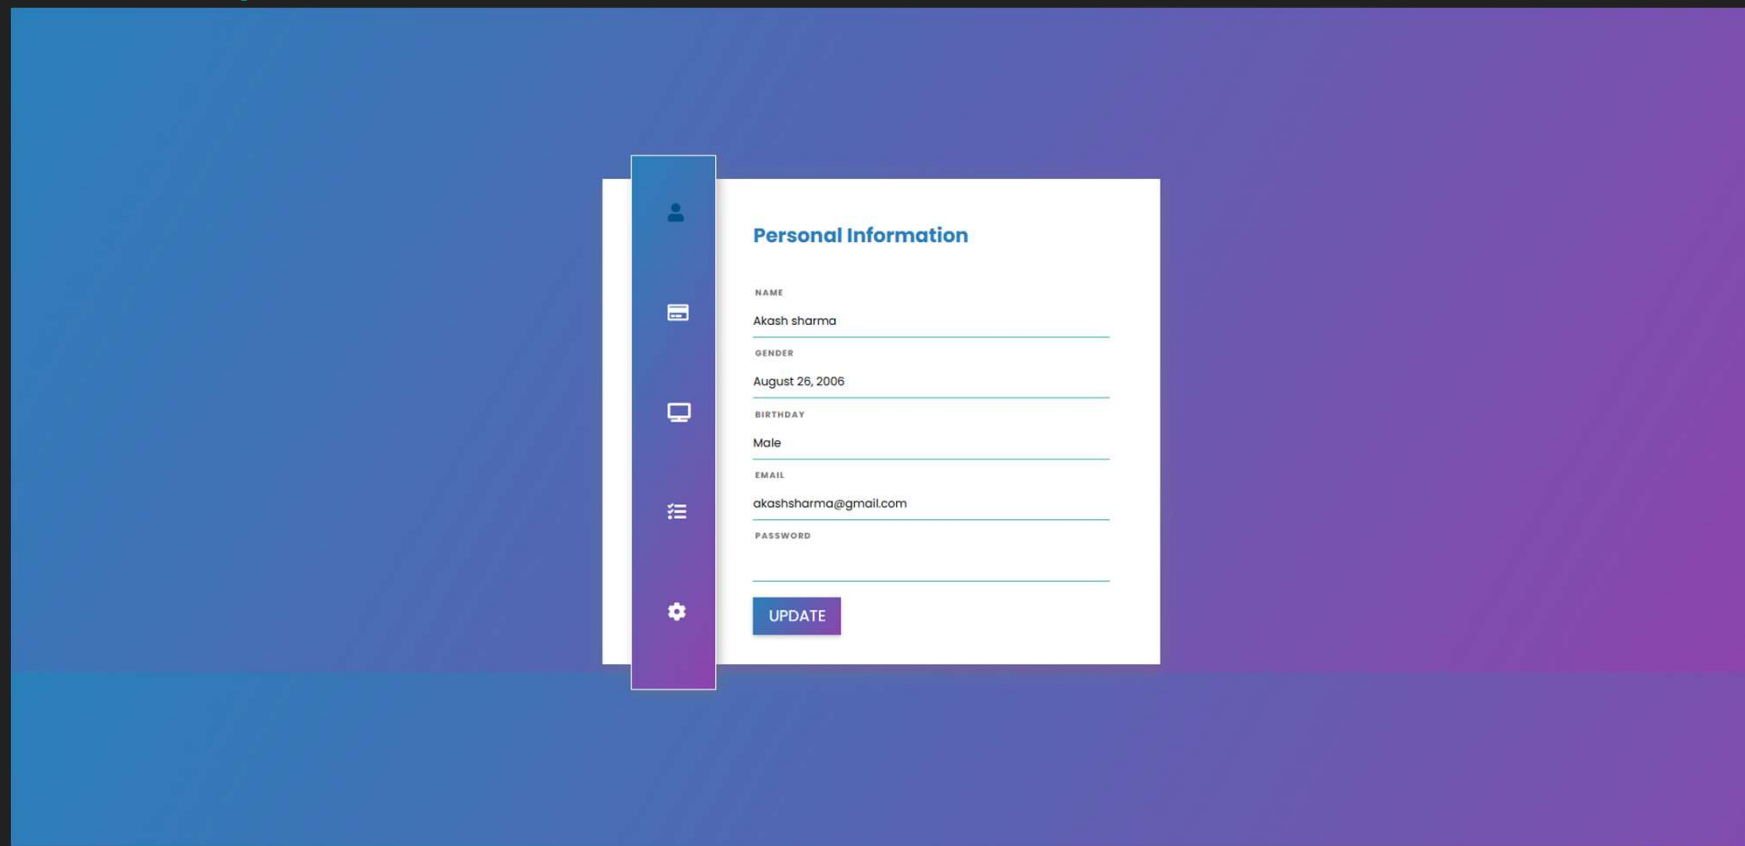

Ava Alex
Marketer

At this Grocery Store, you can get fresh fruits and vegetables. And it is not only about fruits or vegetables, you can buy all kinds of stuff here.

Our Trusted Partner

Frontend (User Details)

The image shows a user details form with a sidebar and a main content area. The sidebar is a vertical bar on the left with a blue-to-purple gradient, containing five icons: a person, a card, a laptop, a list, and a gear. The main content area is a white box with a blue-to-purple gradient background, containing the following fields:

- Personal Information**
- NAME**: Akash sharma
- GENDER**: August 26, 2006
- BIRTHDAY**: Male
- EMAIL**: akashsharma@gmail.com
- PASSWORD**: (empty field)
- UPDATE** button

```

Conclusion & Future Work

- Project streamlines grocery operations with basic automation.
- Future Plans: ML-based expiry prediction, user login, mobile app, and dashboard analytics.

**THANK
YOU**
